TIRE MANAGEMENT SYSTEM

Tire Management System

Serializing the tires

Tracking tire location

**Recording pressure and
tread depth**

Recording usage

Recording tire rotations

Tire Management System

- Each tire must be assigned a unique **ID Number**.
- All costs associated with tire related activities are recorded via Work Orders.
 - ☑ This includes the tire cost, and the costs associated with mounting/dismounting tires and rotating tires.
 - ☑ Tire service costs, such as re-treading, are captured via Work Orders as well.

These costs relate back to the associated vehicle.

Basic Illustration of the Tire Management System

You can set tread depth alert points individually, based on the type of axle that the tire is mounted on. This is most useful for monitoring tread wear on power units, semi trailers, and/or motor coach assets. Various reports will use these tread depth limits.

Integrasia Utama Profile

Background :

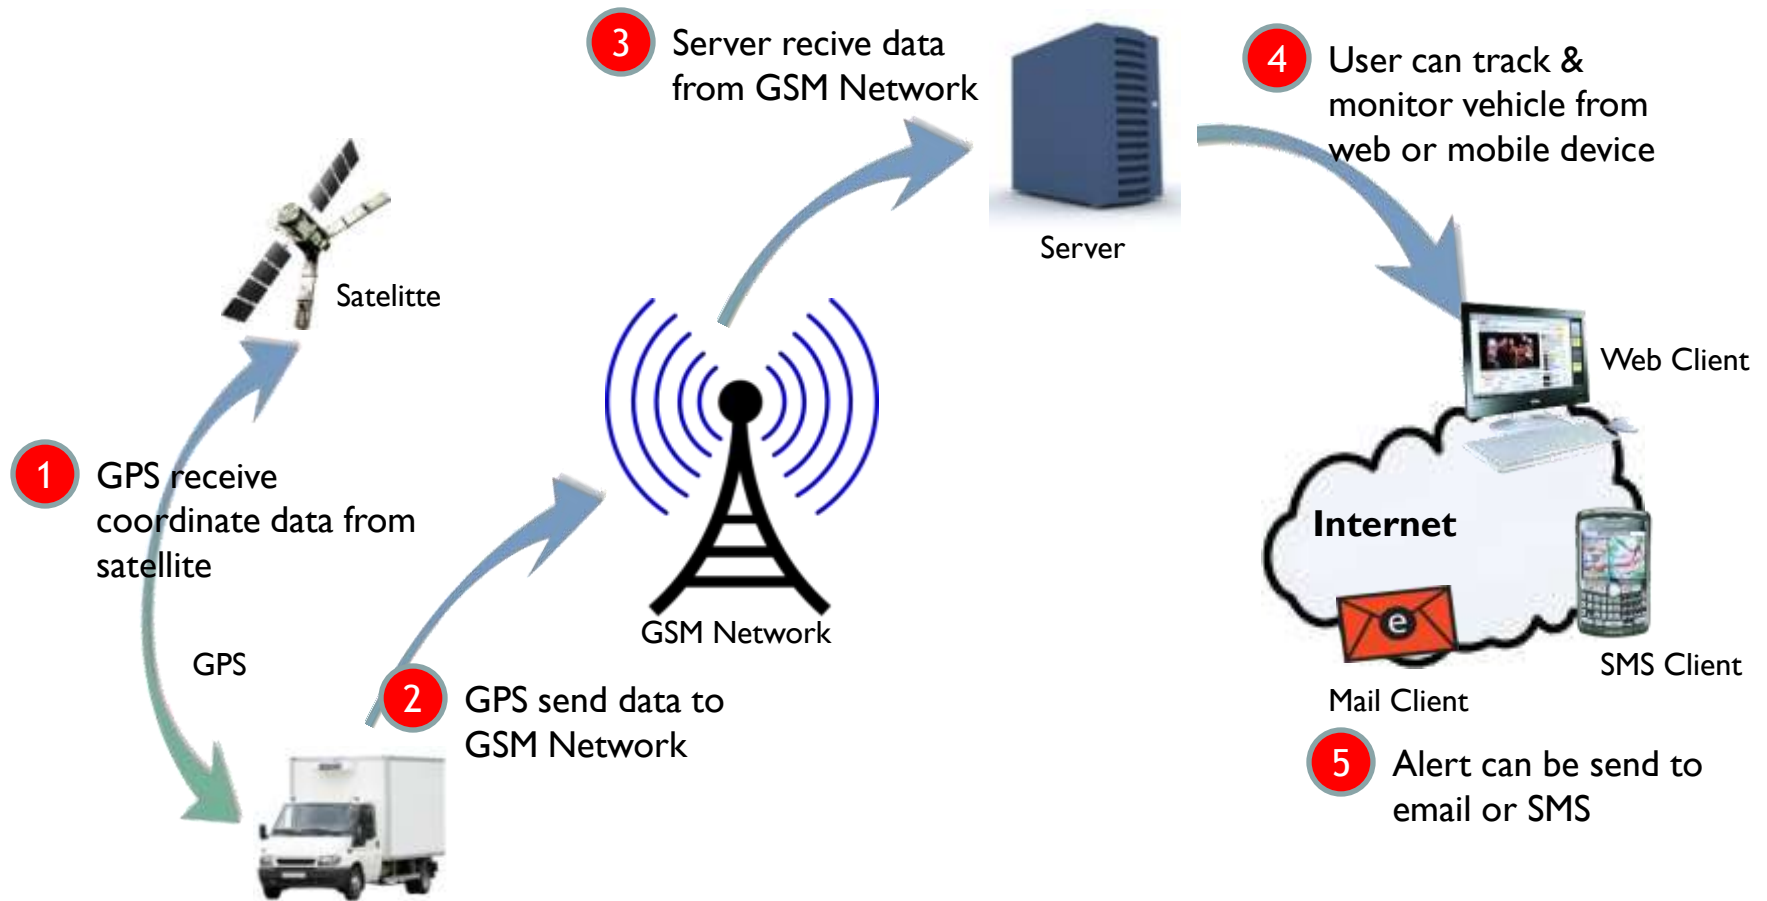

This company which has been established since 2001, started its business in remote sensing and Geographic Information System. As the time passing, PT. Integrasia Utama has become one of the best company which can offer total solution to Indonesia society. In 2006, we expand our portfolio to service Logistic Industry with fundamental software, we develop we called OneSpirits. In 2007, we complete solution with RFID technology.

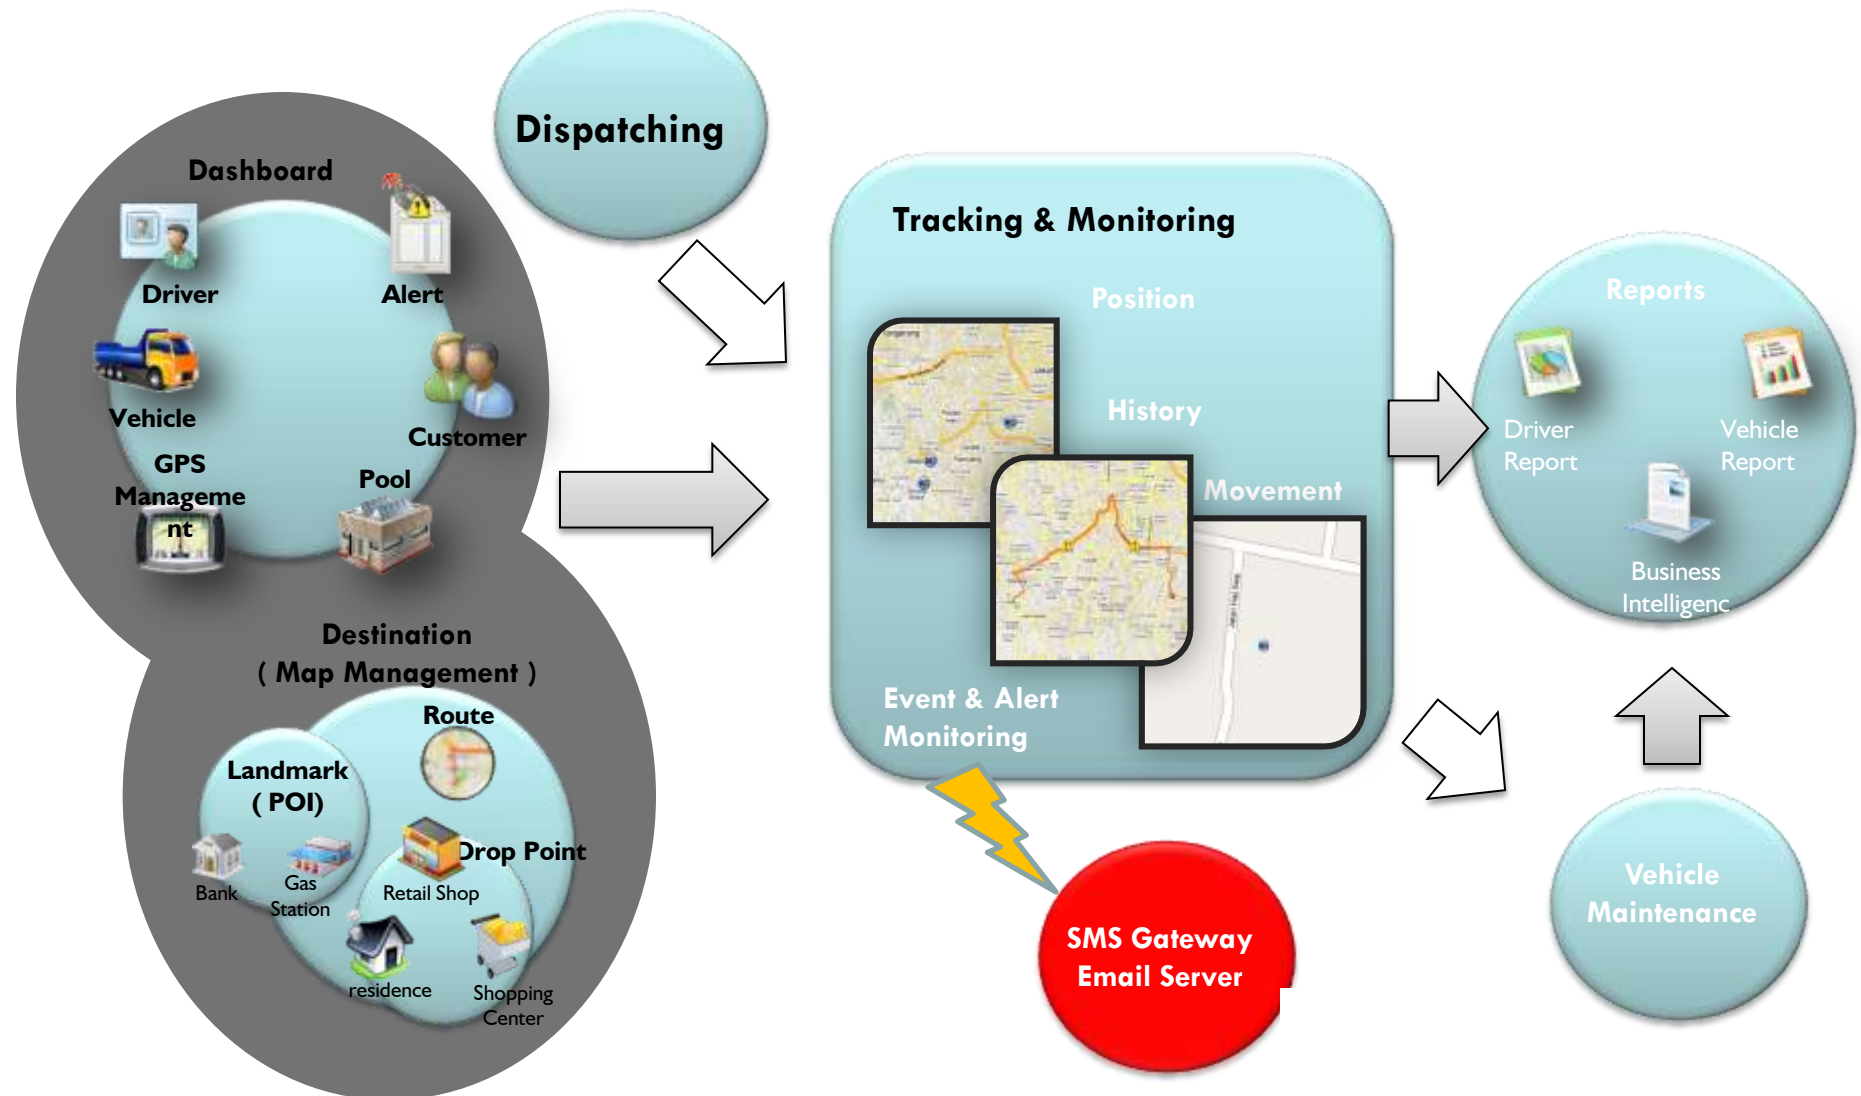

What is One Spirits Logistics

- *One Spirit Logistics* is a Transportation Management System solution for vehicle and vessel
- *One Spirit Logistics* is built to integrate key operational aspects on logistics business process such as TRANSPORT & Dispatching Management, GPS Tracking & Monitoring and Reporting
- *One Spirits Logistic* is a registered Indonesian product with the ability to be customized according to the user requirements
- One Spirit Logistics was developed as an open system that can be connected with a wide range of GPS Tracking Hardware and any existing € . system

How GPS works

How Software Works

More than just a tracking system

- Enhance vehicle utilization
- Enhance on time delivery
- Customer satisfaction
- KPI for driver , being parameter for reward & punishment implementation
- Oslog designed on modular basis
- Oslog middleware can be integrated to enterprise system
- Oslog made by Integrasia, so can be customized easily

Dispatching Management

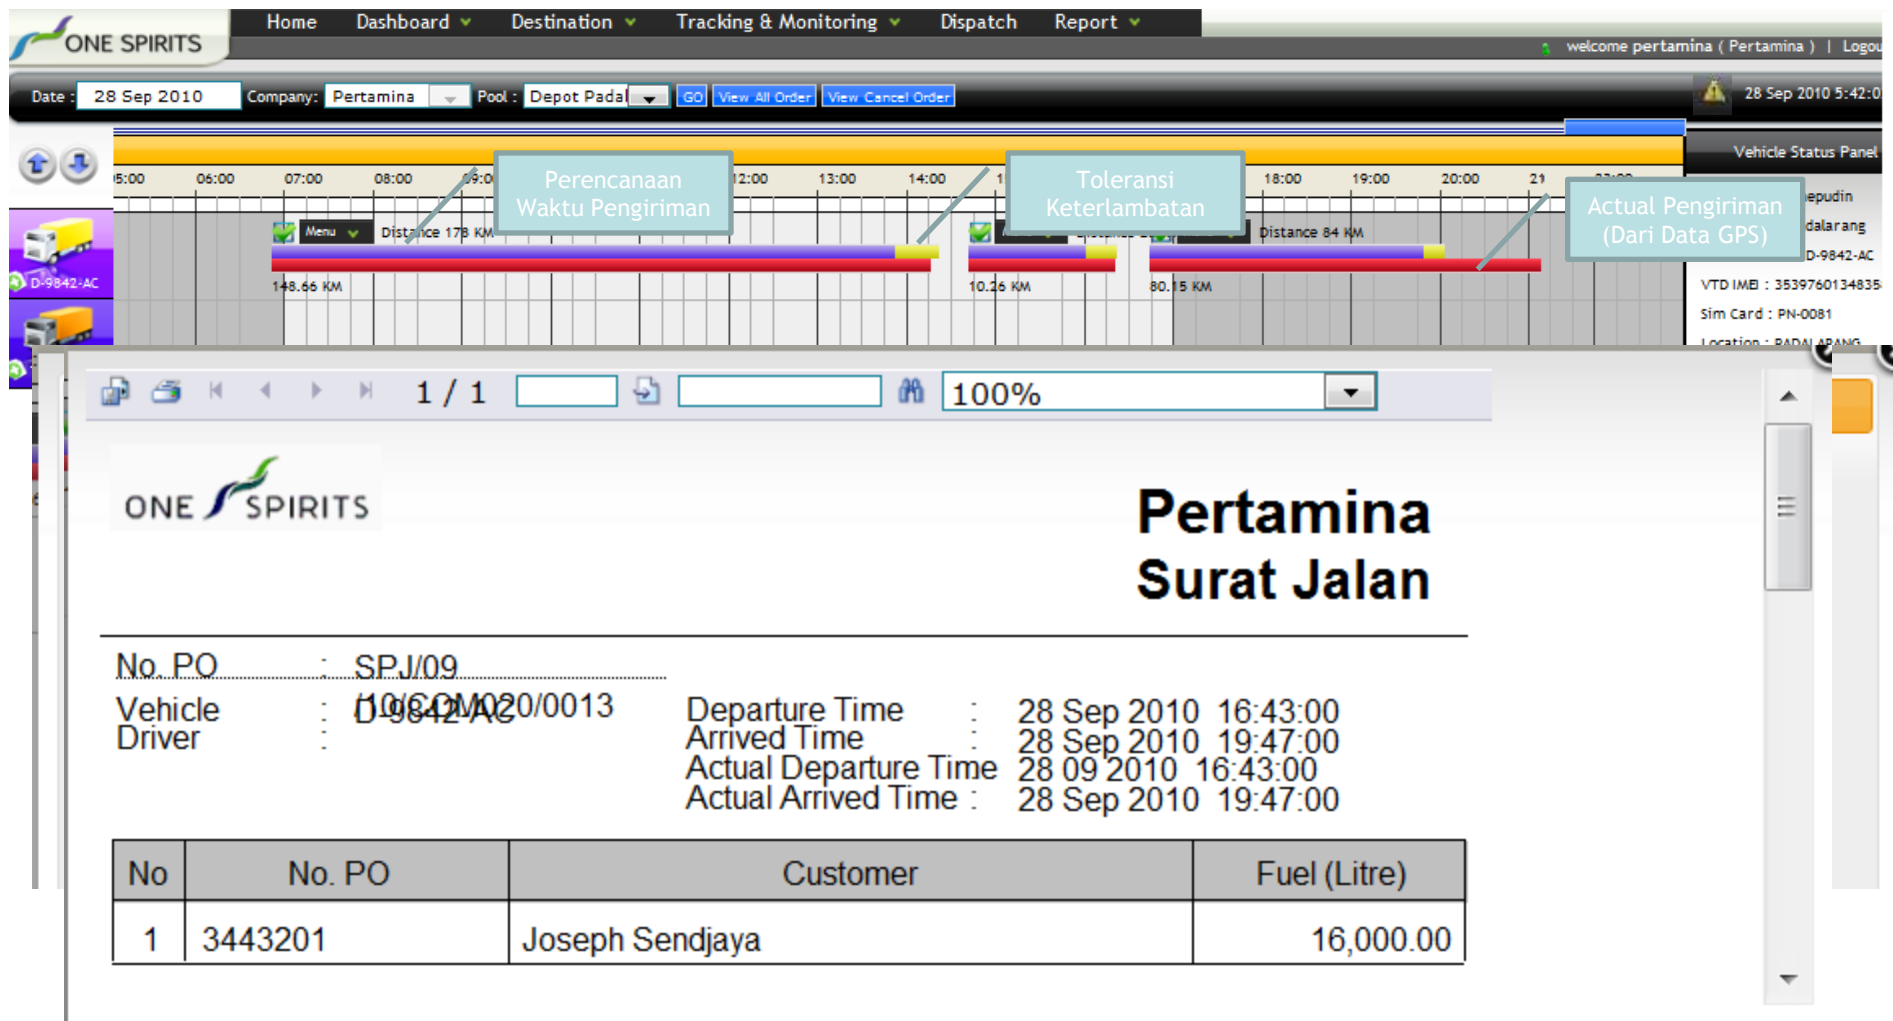

OSLog Features

- Dispatch Management
 - ▣ Delivery Administration
 - ▣ Driver Assignment
 - ▣ Vehicle Assignment
 - ▣ Delivery Destination & Routing
 - ▣ Scheduling

- By this feature :
 - ▣ We can manage vehicle distribution planning and scheduling.

Dispatching Management

Tracking & Monitoring

OSLog Features

□ Vehicle Tracking & Monitoring

- ▣ Last Position Status
- ▣ Travel History
- ▣ Replay Travel History
- ▣ Travel Duration and Distance
- ☑ Accessible by mobile devices
- ☑ Integrated with our Indonesia and Google Map

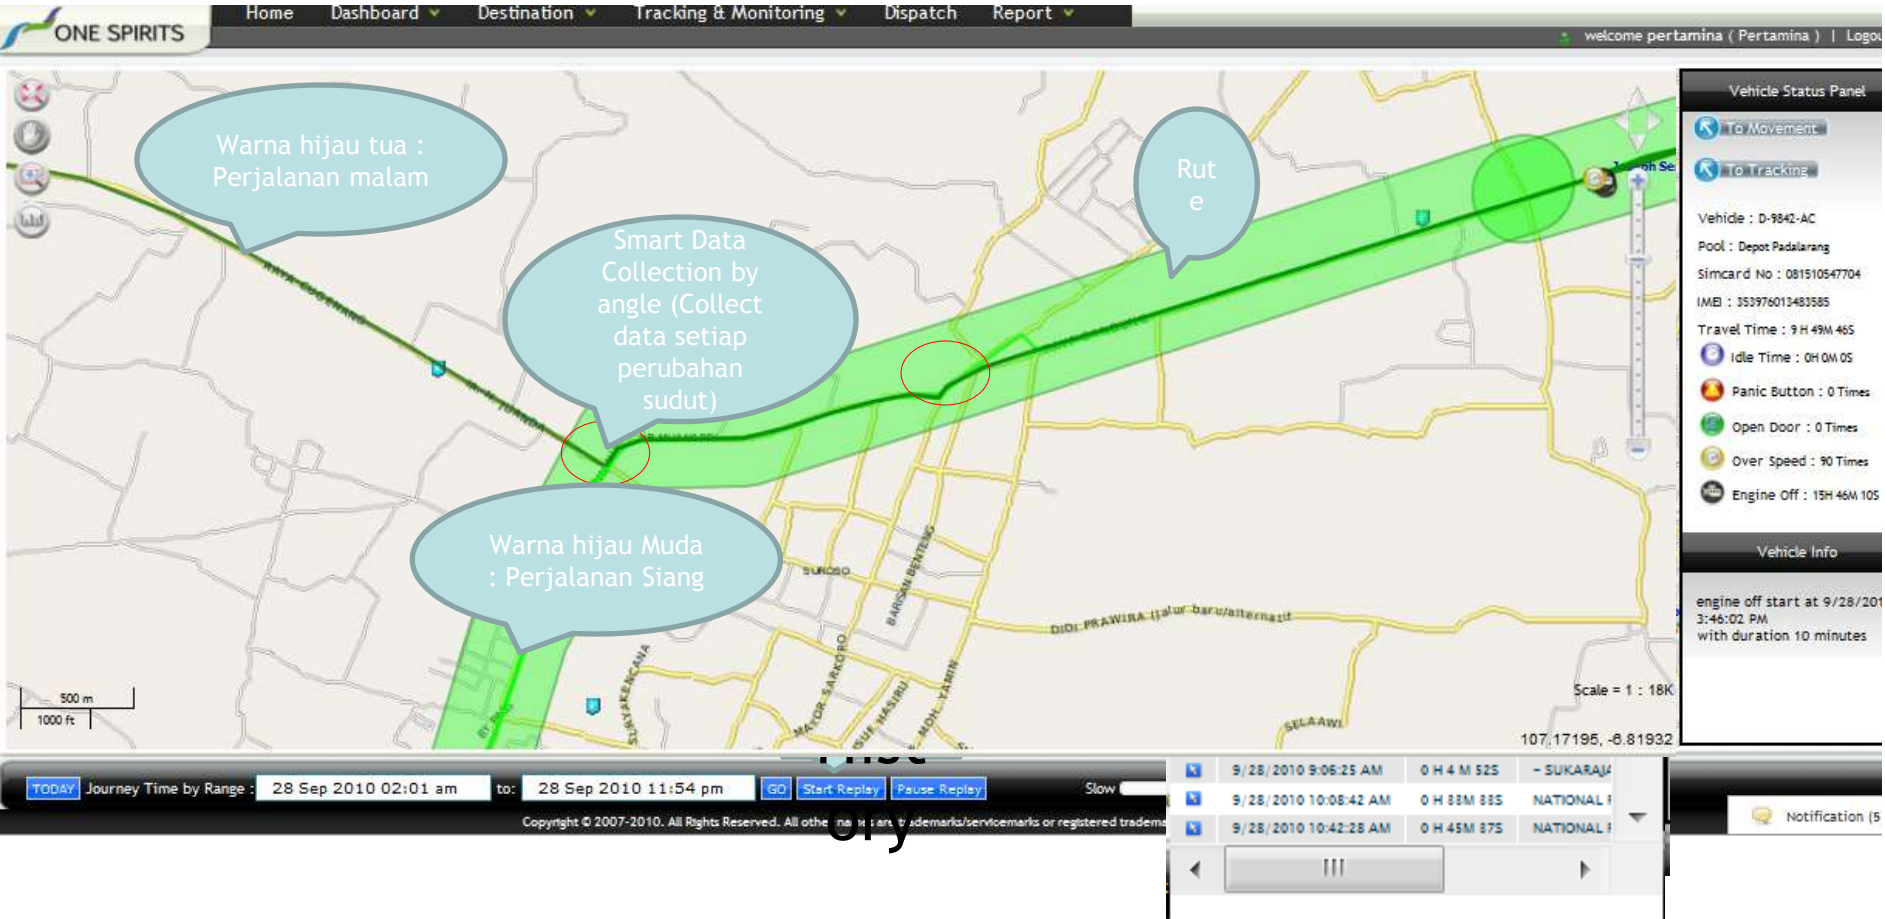

□ By this feature :

- ▣ We can monitor all vehicle journey in real-time.
- ▣ We can analyze all vehicle journey based on data history.
- ▣ We can analyze affectivity of vehicle operational.

REMINDER

- A reminder is created to alert us at some point in the future that something that needs our attention.
- While the reminder has not yet been completed, it stays in a pending state, waiting for a date and/or odometer value to be met.
- Once the date and/or odometer value is met, the reminder is triggered, and is considered Due.
- The reminder then appears in the Reminder window, waiting for you to complete it.
- The reminder will remain due indefinitely, waiting for completion.
